

WORKSHOP ✓

Institute of Biomedical Sciences - ICB-USP
April 2-3, 2019.

To apply: workshopSP2019@gmail.com

Deadline: March 2, 2019. (Free registration)

The Workshop will include seminars/talks from leading Brazilian and foreign scientists in the area of cell stress regulation by chaperone networks in the physiological and pathological contexts. The seminars will focus on uniting the expertise of different groups to discuss recent developments in the field, highlighting mechanisms for the regulation of proteostasis in neurodegenerative diseases, stem cell biology and cancer.

Organizers: Dr. Marilene Lopes (USP) and Dr. Flavio Beraldo (UWO)

Speakers:

Dr. Flavio Beraldo (Robarts Research Institute-University of Western Ontario, Canada)

Dr. Martin Duennwald (University of Western Ontario, Canada)

Dr. David Vilchez (University of Cologne, Germany-to be confirmed)

Dr. Carlos Henrique Inácio Ramos (University of Campinas-UNICAMP)

Dr. Júlio Cesar Borges (University of São Paulo, São Carlos)

Dr. Tiago Goss (AC Camargo Cancer Center)

Dr. Marilene Lopes (Institute of Biomedical Sciences-ICB-USP)

Application:

The selected participants will present their work in the form of poster and 10 abstracts will be selected for 10-15 minutes oral presentation. This workshop will be directed to graduate students, postdoctoral researchers and young researchers. Applicants must send the following documents to workshopSP2019@gmail.com for selection: - Curriculum lattes; - Letter of interest (1 page. max); - Abstract (300 words max). All documents required for the selection process must be written in English, (official language of the event). Financial support: Fapesp
